SUMMARY

Product Designer with proven experience building user-centred digital products across web and mobile. Skilled at leading end-to-end design — from research, wireframing and interaction design to high-fidelity prototypes and developer handoff — in fast-paced startup environments. Strong command of Figma, scalable design systems, and conversion-focused UX. Award-winning designer recognised at national-level competitions for product thinking and design execution.

PROFESSIONAL EXPERIENCE

AI Interview Agents Platform Nov 2024 – Apr 2026
Product Designer

- Designed end-to-end product experience — onboarding, AI interview workflows, analytics dashboards, and results review — improving task completion across all key flows.
- Synthesised user research into personas, journey maps, and interaction flows, grounding every design decision in real user needs and business goals.
- Built a scalable Figma component library (auto-layouts, variants, design tokens) that significantly cut design-to-dev handoff time.
- Iterated on usability findings and stakeholder feedback within a fast-moving agile environment.

Web3Task — TraverseVPN Apr 2026 – May 2026
Product Designer

- Led end-to-end design of the TraverseVPN landing page from concept to production-ready handoff.
- Strengthened information hierarchy, CTA placement, and visual structure to drive conversions and clarity.
- Validated design decisions through iterative testing, reducing cognitive load and ensuring responsive accessibility.

Cloud Computing Cell, AKGEC Feb 2024 – Present
Senior UI/UX Designer

- Led UI/UX design for technical platforms, event systems, and internal tools serving 1000+ students and organisers.
- Architected a scalable design system with 25+ reusable components, ensuring visual and brand consistency across all products.
- Mentored 25+ designers and developers, setting quality standards and reviewing work across live projects.
- Partnered with cross-functional teams through hackathons and agile product sprints, accelerating design cycles.

CERTIFICATIONS

Machine Learning I · Columbia University Oct 2025

EDUCATION

B.Tech, Information Technology
Ajay Kumar Garg Engineering College (AKGEC)
2023 – 2027 · 7th Semester
Available for full-time internship with NOC support.

SKILLS

UI Design · UX Design
Design Thinking · Product Strategy
Interaction Design
Responsive Design
Wireframing · Prototyping
Information Architecture
Usability Testing
Heuristic Evaluation · Accessibility

TOOLS & TECHNOLOGIES

Figma · Design Systems
Auto-layouts · Variants
Component Libraries
Miro · Maze

OTHER SKILLS

Problem Solving · Adaptability
Team Management
Developer Handoff
Cross-functional Collaboration
Agile Workflow

ACHIEVEMENTS

UX/UI Design Challenge / *Winner*

- 1st out of 500+ participants at design challenge **INCLUDE 3.0**, AKGEC Ghaziabad.

IIT Jodhpur Tech Fest / *2nd Runner-Up*

- Designed **PRANA AI**, an AI-powered health & wellness product, placing top 3 at IIT Jodhpur's national technical fest — recognised for product thinking, UX strategy, and design execution.
